Sheet Resistance Meters

GUARDIAN has a highly motivated competent staff of project managers, engineers, technical writers and fabricators ready to assist you in your next project. Our products and systems are installed throughout the world.

GUARDIAN is one of the leading providers of integration solutions and equipment for the automotive, home building products, aerospace, defense, entertainment, and agricultural industries.

Software Development

GMI offers a variety of software development services. Our programmers are fluent in ladder logic, MS.NET, C++, Labview and many more. We utilize the latest Windows based software development tools in creating specific control methodologies for your specific needs.

SCADA Development

From PC based platforms such as Wonderware™ or Rockwell Software's RSVIEW™ to smaller Allen Bradley Panel View 550s. GMI has your solution. Our engineering staff can build to your specific requirements or assist you in selecting a SCADA platform that will meet your exact needs.

Power Distribution

Although the PLC and control components are a vital part of any control system, power distribution is also vitally important to the success of the project. GMI has successfully installed systems as large as 1.25 megawatts.

Ozone Integration

Engineers at GMI have designed the newest and most efficient ozone integrated systems on the market. We are using Plasma Block® Technology combined with a PLC and control interface operating the corona discharge above 20,000 hertz. These units are the most efficient ozone producing machines in the industry and offer exceptional reliability.

Guardian, "A Name You Can Trust"

These companies know it:
